

# Premium SMS Gateway

The mBill SMS gateway **enables** the delivery of **premium or standard** SMS messages worldwide!

Our premium SMS gateway enables clients to either send XML encapsulated or simple GET and POST parameters via a secure HTTP connection.

All connections communicate with a simple "SMSReceive" API which forwards the messages instantly to the end users. This interface enables any custom application or external server to connect to the mBill SMS gateway and deliver premium or standard SMS messages.

## Availability

Premium SMS connections are available in the USA, Australia, Germany, Spain, Holland and the UK. The mBill gateway provides worldwide coverage for standard SMS.

Our global coverage of standard SMS services allows clients to still offer a credit card and IVR solutions to their end users who reside in countries with very primitive SMS services. Premium sms, credit card and IVR solutions can be offered to end users in areas with the latest technology SMS services offered.

## Tariffs

Premium SMS messages can be charged at varying rates depending on the short dial code used. There can only be a single tariff per short dial code but many messages can be sent per end user transaction on short dial codes on which the user is billed when they receive the premium message (MT).

For further information on short dial code setup and tariffs please contact the mBill sales team today!

## Premium SMS Gateway Benefits

- > Easy HTTP or XML message routing methods.
- > Secure message sending using IP address, username & password protection.
